

## Infographic: Paperless Apron Tracking

Sites around the country are being asked to prove apron QC on the spot.  
**With the QC-Track Aprons module, it's easy!**

The **QC-Track Aprons** module is a centralized intranet or cloud-based system for apron quality control (QC) and inventory tracking. With a browser on your network, your team can manage aprons across all departments and facilities.

*Here's how it works:*

### 1. Get Email or Dashboard Notice When QC Is Due

Schedules set by location or department.

### 2. Attach Barcode Tag and Add Apron to QC-Track Inventory

Each tag has a unique barcode; plastic and adhesive available.

### 4. Retrieve Inspection History with Reports

Reports can be saved or emailed as PDFs.

Paper Can't Keep Up

QC-Track supports tracking needs from single room facilities through large distributed hospital networks.

Simplify Apron Compliance

- ✓ Meets CMS, TJC, and state inspection requirements
- ✓ Simple and easy to use
- ✓ Automatic email notifications
- ✓ Different departments can be on different QC schedules
- ✓ Centralized management and failure tracking
- ✓ Easy access to QC records in remote locations
- ✓ Batch management of overdue and missing aprons

The paperless QC-Track system simplifies compliance, accelerates QC workflows, and improves QC communications.

“My Joint Commission Inspector appreciated the QC-Track reports during the inspection.”
