

Seeking a robust fluoro QC process?

Be Always Inspection Ready™ with QC-Track®

QC-Track®

ATIRIX® Medical Systems

Many sites are tracking state-inspected fluoro QC with binders and spreadsheets.
Ready for a better way?

Go Paperless with QC-Track

QC-Track is a complete intranet QCIS™ for device quality control covering all modalities, including fluoroscopy.

With a browser on your network, your team can use QC Worksheets, QC Dashboards, and QC Reports to stay fluoro-compliant.

QC-Track's workflow ensures that all of your sites and rooms are following a defined QC schedule and using consistent QC practices.

START

Here's how it works:

1

Implement Ongoing Fluoro Device QC:

Technologists
Management
Physics Team

- Schedule workflows to gather required data on all fluoro units, including C-arms, mini-Cs, bi-plane units, and R/F rooms
- Monitor and manage weekly QC with Checklist and Device Worksheet reports

Consistent fluoro
QC across all
devices and
locations

2

Track Technologist Credentials:

Technologists
Management

- Track and report on the training of fluoro clinical professionals with the QC-Track.Credentials™ module
- Automatically send email reminders and notices for expiring and overdue credentials

Centralized
credential tracking
for the entire
imaging team

3

Schedule Physicist Annual Surveys:

Technologists
Management
Physics Team

- Set up and track all fluoro QC events, including physicist surveys, with the QC-Track.Planner™ module
- Scan and attach documents such as Annual Survey reports and ongoing PM/Service reports to the Event and to the Device

A visual overview
of all PM and
Service events and
a central data
repository for
storing documents

 **The Result: A fluoro QC process with all the benefits of paperless device QC**

Upgrade to an
Enterprise QCIS™

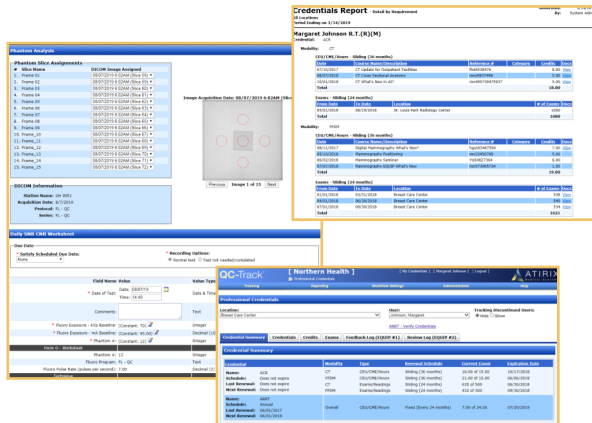

Be Always Inspection Ready™ across all imaging modalities, including modules for Mammo/FDA EQUIP, Ultrasound HLD/Exam traceability, and CT/MRI.

Ready? Learn more about QC-Track and enterprise solutions for fluoro and more.

CT • MRI • DBT/FFDM/Stereo • Nuc Med/PET/Fusion • Fluoro • US • DR • Aprons • Credentials • Events/Documents

Simplify Compliance

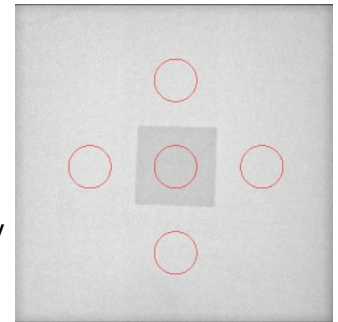

The paperless QC-Track System simplifies compliance, accelerates QC Workflows, and improves QC communications. The Result? *Always Inspection Ready™*

Automated Analysis

Analyze fluoroscope performance with QC-Track's automated phantom analysis module

- **SENSITIVE:** Handles fluoroscopy loops and calculates average SNR over a loop
- **OBJECTIVE:** Provides a robust, observer-independent analysis
- **EFFICIENT:** Ensures a quick and simple workflow with preprocessing services and DICOM connectivity

QC-Track: Complete Paperless QCIS™

- Device Quality Control
- Credentials Management
- Personal Apron Tracking
- QC Event and Document Tracking
- Ultrasound HLD/Exam Traceability

Upgrade to an Enterprise QCIS™

QC-Track has been proven since 2008 in thousands of inspections. Modules are available across modalities. Whether it is FDA/MQSA, ACR, TJC, AAPM, AIUM, or state requirements, your entire imaging quality team can be Always Inspection Ready™.
